BRACKET RACING

Frequently Asked Questions

What is Bracket Racing?

Bracket racing is a form of racing where competitors are grouped into brackets according to their lap times, and not by the class of bike they are riding.

Why have this type of racing?

Because this form of racing provides a very enjoyable and low cost form of racing. Riders can be assured that they will have the fun of dicing with other competitors and not circulating around by themselves. It is low cost because you can race whatever bike you have available and it does not need to be a competitive model or have the latest hot up components to be competitive in your bracket.

What do I need to do to prepare my bike?

Your bike will need to conform with the requirements of road racing as per the GCR's, such as lock wiring, removal of stands and glass etc. Preston members will be able to help you with your bike preparation if you are unsure how to do it.

What do I need for protective clothing?

You will need full leathers 1 or 2 piece that zips together as well as the usual requirements of back protector, gloves, boots and helmet that comply with the GCR's.

What sort of licence do I need?

You will need to be a member of the Preston MCC and hold an MA race licence or purchase a 1 day competition licence.

I am nervous of being in a race start what can I do?

If you wish, you can start from the back of the grid until you are confident enough to start from your qualifying position.
